

New Version

2023.3.0

What's new?

A new drillable component has been added to the N4V suite: **Pyramid or Funnel**.

You can now represent your channels or other distribution in a **drillable pyramid** or a **drillable funnel** on 5 levels

Popup filters have been completely redesigned to **enhance their performance** and make it even **easier to analyze** data in the filter table.

Popup filters can now be:

- Resized
- Moved in window
- Left open simultaneously

Multi-select filters are enhanced with search and select/view buttons...

The **filter and sort icons** are now better positioned and the same color as the header labels.

More **legibility** for your maplines! Display **areas without data**, enrich the N4V data table...

Zones without data can be displayed in the legend...

Long header labels are now displayed on several lines

Aggregation functions are explicitly displayed

The **zone names** of maplines are displayed in the Data table.
