

Nouvelle version 2025.1

OpenStreetMap

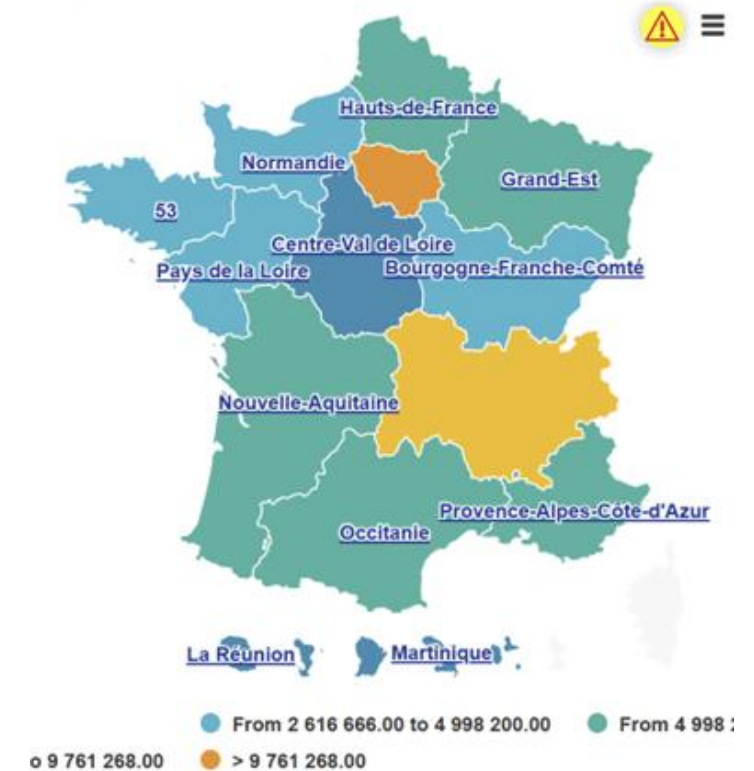

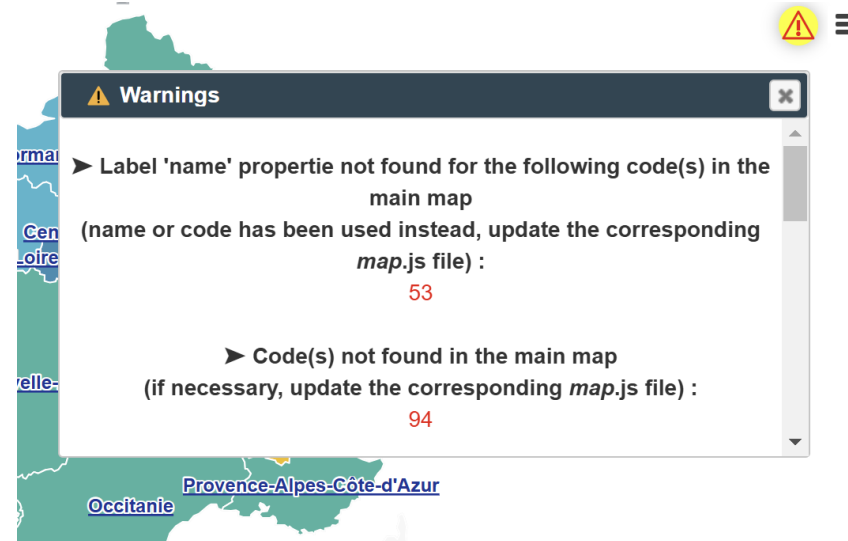

OpenStreetMap devient encore plus personnalisable avec la possibilité de choisir différents fournisseurs de fond de carte ou d'utiliser un **serveur local**.

Évolutions

L'import des cartes personnalisées est simplifié, plus besoin de gérer des fichiers de configuration !

Un **popup** d'alerte s'affiche désormais automatiquement pour indiquer les codes incorrects et autres incohérences dans les cartes et/ou les données, tout en permettant l'affichage de la carte avec les données valides.

Fusion des cellules

Une demande fréquente **réalisée** : vous pouvez désormais **fusionner des cellules** dans vos tables scrollables **horizontales et verticales**. Un affichage plus **clair**, plus **lisible**, pour une meilleure lecture de vos données même dans les tableaux complexes !

State	California									Colorado

Nouvelle Console Admin

- 1 **Sécurisation de la console** (mots de passe).
- 2 **Gestion des composants** à afficher dans Webi + limites de lignes.
- 3 **Gestion des logs**, de la base MongoDB, des pools SFTP...
- 4 **Gestion interactive des palettes de couleurs** et des picturals dans N4V.

Composants	Component	Description	Enabled	Row limit
Run log	Mapline	Map allowing the display of a bubble or a pie chart for each zone. The size of the pie chart is a measure. The color of the zone is indicated by a measure.	<input checked="" type="checkbox"/>	30000
Error log	Mapline Drilldown	Map of level 1 allowing the display of a pie chart for each division. The size of the pie chart is a measure. The color of the division is indicated by a measurement. A drill for each division displays a sub level (breakdown by division level 2) with the same level of information as for the first level (pie chart and color by division of level 2).	<input checked="" type="checkbox"/>	30000
	WebMapline	Map on online cartographic background allowing the display of a bubble or a pie chart for each zone. The size of the pie chart is a measure. The color of the zone is indicated by a measure.	<input checked="" type="checkbox"/>	30000
	Google Maps Lat/Lon	Google Map for geolocating data (latitude / longitude) and displaying a tooltip. The definition of a measure also makes it possible to display a circle of variable size around the pin. The color of the circle can be given in 5th optional parameter in RGB format. A clickable legend can be defined by optional 6th parameter (only if 5th is used)	<input checked="" type="checkbox"/>	10000
